

GREAT WEST EQUIPMENT
BATTERY PRODUCT LINE

gwequipment.com

GREAT WEST EQUIPMENT COMMERCIAL BATTERIES ARE SPECIFICALLY DESIGNED FOR:

- ✓ HARSH OPERATING ENVIRONMENTS
- ✓ EXTREME VIBRATION
- ✓ HUGE TEMPERATURE SWINGS
- ✓ DUST AND DIRT
- ✓ LACK OF ROUTINE MAINTENANCE

AGM BATTERIES

Designed to deliver premium starting and deep cycle service performance in **heavy duty to extreme duty cycling applications** such as lift gates and HVAC systems. AGM batteries enhance the efficiency of your vehicle's electrical system by delivering power faster and recharging more quickly than regular starting batteries.

- Maintenance-free design
- Spill-proof and leak-proof design
- Maximum vibration resistance
- Maximum cycle life in commercial applications

FAHRENHEIT BATTERY (AGM HIGH HEAT OPTION)

Fahrenheit commercial batteries are the only batteries with Thermal Shielding Technology. This technology not only protects from the heat but extends life under extreme conditions. Special innovations enable a battery that provides longer cycle service than an AGM product (50% longer under high heat test). Fahrenheit is tough enough to handle the extraordinary conditions where ordinary batteries give up and quit.

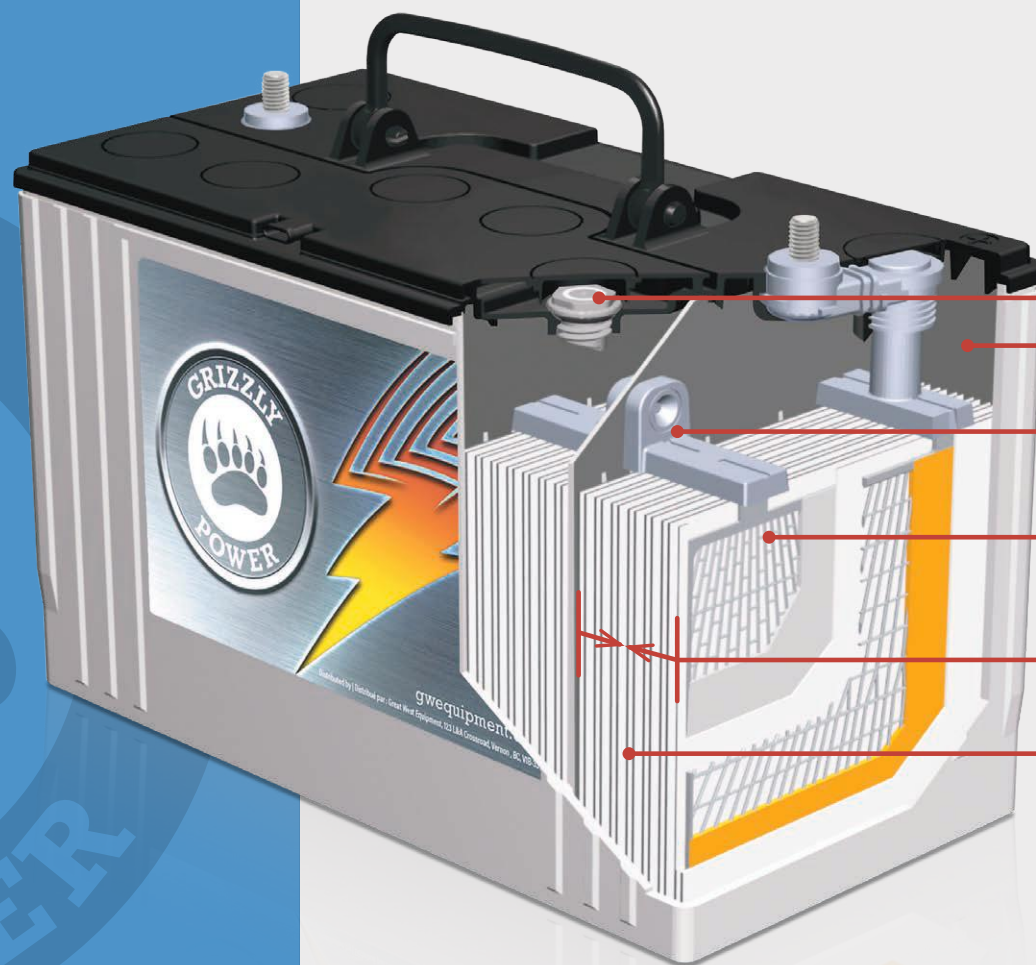

Life Extending Catalyst
Avoids no-starts by protecting performance and extending cycle life.

Fahrenheit Case & Cover

Exclusive reinforced design safeguards performance from heat, frequent use, and vibration damage.

TempX Alloy

Alloyed for high heat protection and to optimize power flow.

WHAT'S ON THE INSIDE COUNTS

AGM BATTERY SHOWN

SAFETY RELIEF VALVE SYSTEM

ULTRA-PURE DEMINERALIZED ELECTROLYTE
Precision filled for extended life.

FORTIFIED POSTS, STRAPS & WELDS
Resist vibration damage, maximize current transfer.

HEAVY-DUTY OPTIMIZED POWER PLATES
Full-frame positive & negative plates prevent life robbing electrical shorts from exposed wire and maximizes power & energy storage capacity.

OPTIMIZED COMPONENT COMPRESSION
Provides superior vibration resistance.

ENHANCED ELECTROLYTE SUSPENSION SYSTEM
Completely absorbs electrolyte for spill-proof design.

DUAL PURPOSE BATTERIES

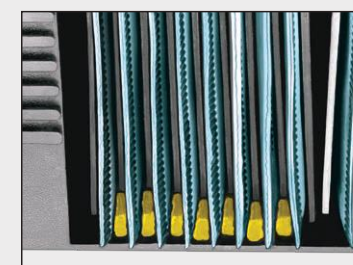

Dual Purpose commercial batteries are specially designed to deliver ample starting and deep cycle service in **medium duty to heavy duty cycling applications**.

- Thicker heavier battery plates better resist corrosion than starting batteries thus delivering more power and extended battery life
- Fiberglass wrapped around battery plates embeds into the plate surface, for added reinforcement

Plates are anchor locked to the bottom of the case to protect against vibration damage.

(DUAL PURPOSE & STARTING)

STARTING BATTERIES

Starting commercial batteries are designed to deliver **heavy duty starting power**.

- Maintenance free design
- Deep pocket envelope separators protect against internal short circuits

THE RIGHT DESIGN TO AVOID COSTLY DOWNTIME

AGM (ABSORBED GLASS MAT)

Premium maintenance-free starting & cycling power. AGM batteries are designed to power more electronics longer with twice the cycle life of regular flooded batteries.

GEL

The premium choice for power, non-spillable performance and longer cycle life service. Gel batteries offer twice the cycle life of AGM batteries.

Deep cycle applications where Gel batteries excel:

Commercial deep cycle applications

Marine & RV house power

Renewable energy (Solar, Wind)

Marine trolling

Maintenance equipment

FLOODED

A complete line for every vehicle in your fleet

Manufactured with state-of-the-art maintenance-free technology, with special features and precision-focused manufacturing processes that deliver long life and high performance.

ATV & UTILITY VEHICLES

Premium quality, factory-filled ready-to-install AGM technology ideal for vehicles with heavier accessory draws. Extended storage life for seasonal applications.

SMALL ENGINE

Durable batteries fit a variety of small engine applications and last longer in demanding outdoor seasonal use.

MARINE/RV

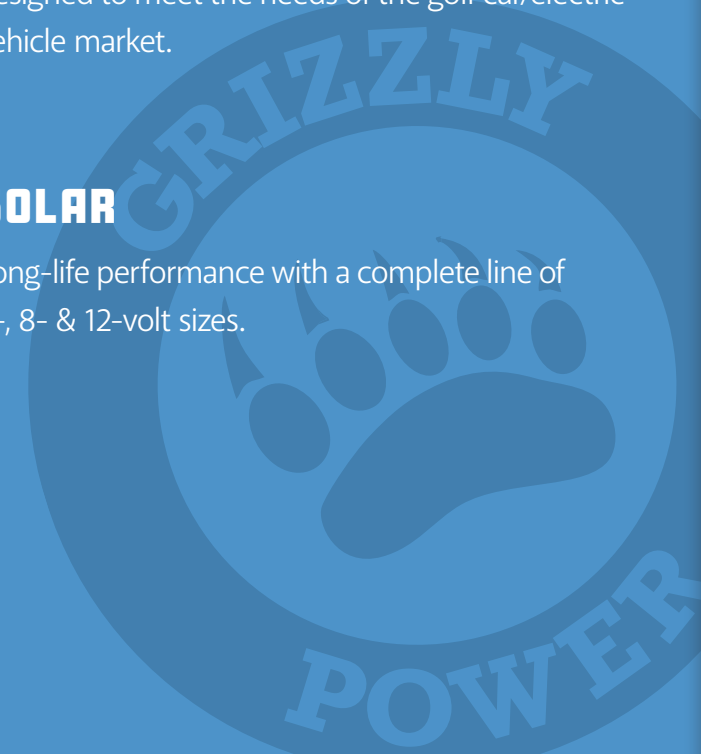

Starting, deep cycle, and dual-purpose batteries provide dependable power for virtually any marine or RV need.

PERSONAL CARRIERS

Superior performance with deep cycle power designed to meet the needs of the golf car/electric vehicle market.

SOLAR

Long-life performance with a complete line of 6-, 8- & 12-volt sizes.

SMALL SEALED BATTERIES

Premium quality, factory-activated AGM technology available in all the popular sizes.

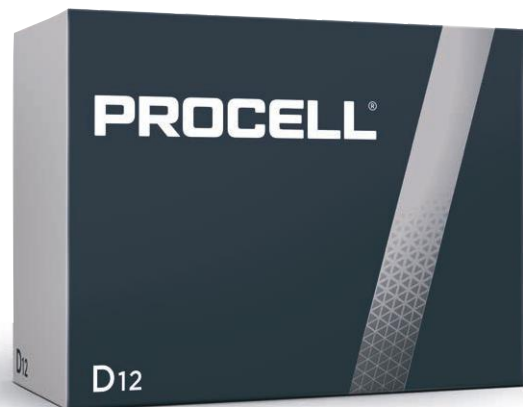

From ATV's to Vending Machines ...
... and everything in-between!

- ATVs & scooters
- Burglar/fire alarm systems
- Communications devices
- Electric fences
- Electric pumps
- Electric scales
- Emergency backup power
- Emergency lighting
- Environmental test equipment
- Exit signs
- Garden equipment
- Marine equipment
- Medical equipment
- Portable equipment and tools
- Riding equipment
- Security cameras
- Solar power (road signs)
- Trailer brake backup systems
- Vending machines

DURACELL® PROCELL® ALKALINE

Duracell® ProCell® Batteries provide long lasting power for today's battery powered industrial devices. Reducing the number of times workers have to replace batteries, makes them more productive and cuts costs.

GREAT WEST EQUIPMENT'S SERVICE ADVANTAGE

Great West Equipment is a full-service heavy equipment dealership with 11 branches across British Columbia and the Yukon. Our head office is located in Vernon, British Columbia, in the Okanagan Valley. With our early roots in the forestry and construction industries, we have grown to become a major force in all heavy equipment segments including mining, and oil and gas. Now we have partnered with another industry leader, East Penn Canada, to provide you with the most reliable batteries in the market for your heavy duty equipment, as well as all fleet and utility needs.

PEACE OF MIND WARRANTY

Hassle-free warranty coverage, with up to 3-year free replacement from date of installation.
