# STUMP GRINDERS

While taking into account contractor's needs and comments for a stump grinder, CMI designed it with its legendary simplicity to maximise the performance and reliability. CMI stump grinders are built with highest quality components such as bearings, bigger shafts and the strongest chassis in the industry.

The stump grinder attachment is available for the C250, C400L and C450. Equipped with a 38 inches diameter Bucktooth® wheel, it has a greater torque than the competition. The 64 teeth on the wheel make a smoother cut.
